

Maxifleur

artificial plants

UV-PROOF

MAINTENANCE OF UV PRODUCTS

- We provide an 8-year color guarantee on the plastic parts of UV-resistant products with the UV logo.
- To extend the lifespan of the wood, we recommend staining or treating it with a transparent varnish. We do not provide a warranty on the wood.
- Make sure the plant can drain well. Preferably, do not place the plant directly in the ground. Ensure that the hole in the black inner pot remains open so that water cannot stay in the pot.
